The following documents identified in the International Search Report have been considered for this report:

D1: US 4391935 A (General Electric Company) 05 July 1983 D2: EP 1069156 A (Cheil Industries Inc.) 17 January 2001

Claims 1-4 meet the criteria set out in PCT Article 33(2)-(3), because the prior art does not teach or fairly suggest any of the embodiments as specifically set forth in the claims.

The invention described in claim 1 relates to a flame retardant thermoplastic resin composition which comprises a polycarbonate resin, a rubber modified vinyl graft copolymer, a vinyl copolymer, a monomeric phosphoric acid ester, an oligomeric phosphoric acid ester compound and a fluorinated polyolefin resin. Document D1 discloses an improved flame retardant polycarbonate composition of an aromatic carbonate polymer. Document D2 discloses a flame retardant thermoplastic molding composition which comprises a thermoplastic polycarbonate, a styrene graft polymer, a phosphate compound and a fluorinated polyolefin etc. However, none of these cited documents describe or fairly suggest a flame retardant thermoplastic resin composition which includes a monomeric phosphoric acid ester compound represented by a formula(I) or a mixture thereof and an oligomeric phosphoric acid ester compound represented by a formula(I) or a mixture thereof, as described in claim 1.

Therefore, the subject matter of claim 1 is considered to be novel and to involve an inventive step; consequently, the subject matter of dependent claims 2-4 is also novel and inventive.

Claims 1-4 meet the criteria of PCT Article 33(4), IA, because the invention is industrially applicable.
